

MORE GOOGLE REVIEWS · HIGHER ON GOOGLE MAPS · MORE CUSTOMERS

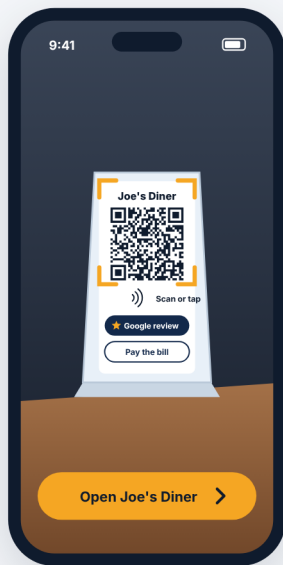

Turn happy customers into Google reviews, in one tap.

Most happy customers never leave a review. Not because they didn't like you: nobody asked at the right moment, and finding your Google page takes too many steps. **GuestEcho's QR + tap stand on your tables and counter opens your Google review page instantly**, right when guests are about to pay.

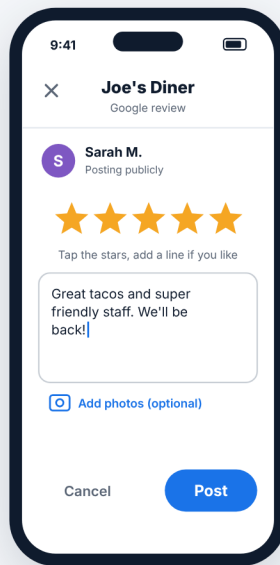

How it works

Three taps. No app. About 30 seconds.

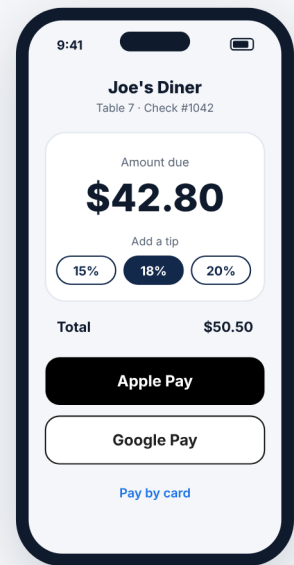

1 Scan or tap

Guests point their camera at the QR code or tap their phone on the stand. Nothing to install.

2 Review on Google

Your Google review page opens instantly. Stars and a one-line review take just seconds.

3 Pay the bill

One more tap opens your usual payment link (Square, Toast, Stripe, PayPal...). Your money goes straight to you.

Always the guest's choice: they can skip the review and go straight to paying. Every guest is asked the same way, exactly as Google's review rules require. No fake or paid reviews, ever.

Climb Google Maps

Google counts how many reviews you have and your rating when it ranks local results. More reviews help you show up for "near me" searches.

Win the click

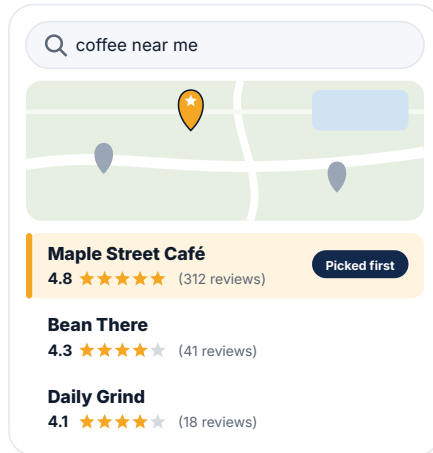

People pick the place with the better rating and the newest reviews. A steady flow of fresh reviews keeps that place you.

Zero work for your staff

The stand does the asking at the best moment. Nothing to install, nothing to train, no awkward conversations.

Why Google reviews bring you customers

"Google review count and review score factor into local search ranking. More reviews and positive ratings can improve your business's local ranking."
