MORE GOOGLE REVIEWS · HIGHER ON GOOGLE · MORE TRUST

Turn happy customers into Google reviews, in one scan.

Most happy customers never leave a review. Not because they didn't like you: nobody asked at the right moment, and finding your Google page takes too many steps. **Aurenflow's QR code on your tables, counter and receipts opens your Google review page instantly**, so a review takes seconds.

1 · RANK HIGHER

More reviews, higher on Google

Google ranks local businesses partly by how many reviews they have and by their star rating. More good reviews help you show up higher in Google Search and Maps, where new customers look first.

2 · BE TRUSTED

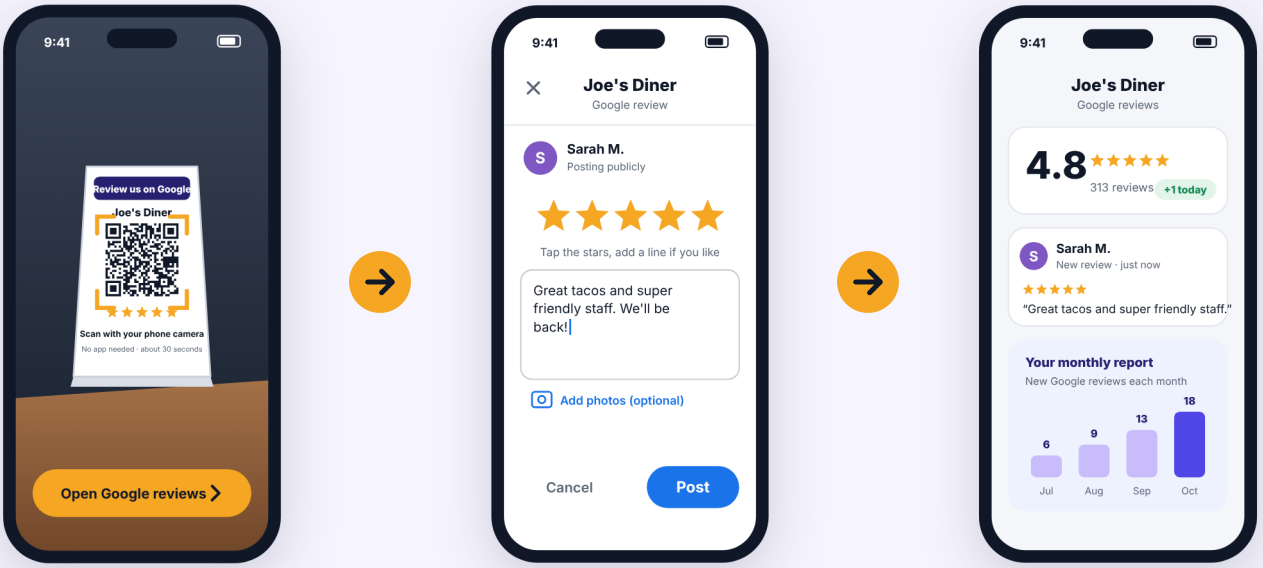

More reviews, more trust

Reviews are proof. New customers read them before they visit, and plenty of recent, positive reviews show them you are real, established and safe to choose.

> **47% of consumers won't use a business with fewer than 20 reviews.**

How it works

One scan. No app. About 30 seconds.

1 Scan

Customers point their phone camera at your QR code: on the table, the counter, the receipt or the window.

2 Review on Google

Your Google review page opens instantly. Stars and a one-line review take seconds.

3 Watch them add up

Every review lifts your count. We track your Google reviews and send you a report every month.

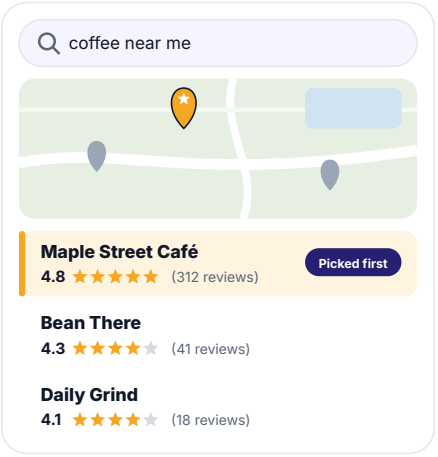

Fair and within Google's rules: every customer is asked the same way, and nobody gets anything in return for a review. No fake, paid or filtered reviews, ever.
